**Q.1. Suppose you have a tuple data = (12, 13, 51, 10, 22) you have to add two more elements into it.**

# Write a program to Suppose you have a tuple data = (12,13,51,10,22) you have to add two more elements into it.

### CODE: -

```
tuple_data_1 = (12,13,51,10,22)
tuple_data_2 = (100,500)
tuple_data_1 = tuple_data_1 + tuple_data_2
print(tuple_data_1)
```

### OUTPUT: -

(12,13,51,10,22,100,500)

```
Practical.py > ...
1 # Write a program to Suppose you have a tuple
2 # data = (12,13,51,10,22) you have to add two more elements into it.
3
4 tuple_data_1 = (12,13,51,10,22)
5 tuple_data_2 = (100,500)
6 tuple_data_1 = tuple_data_1 + tuple_data_2
7 print(tuple_data_1)
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL

```
PS D:\VS CODE> python -u "d:\VS CODE\Practical.py"
(12, 13, 51, 10, 22, 100, 500)
PS D:\VS CODE>
```
