Q. Design a responsive web page for customer registration by use of react JS class component.

```
import React, {Component} from 'react';  
class CustomerRegistration extends Component {  
  constructor(props) {  
    super(props);  
    this.state = {  
      firstName: "",  
      lastName: "",  
      email: "",  
      password: "",  
    };  
  }  
  handleInputChange = (event) => {  
    const { name, value } = event.target;  
    this.setState({ [name]: value });  
  };  
  handleSubmit = (event) => {  
    event.preventDefault();  
    console.log('Form submitted:', this.state);  
  };  
  render() {  
    const { firstName, lastName, email, password } = this.state;
```

```
return (  
  <div className="container">  
    <h2>Customer Registration</h2>  
    <form onSubmit={this.handleSubmit}>  
      <div className="form-group">  
        <label htmlFor="firstName">First Name &nbsp;</label>  
        <input  
          type="text"  
          className="form-control"  
          id="firstName"  
          name="firstName"  
          value={firstName}  
          onChange={this.handleInputChange}  
          required  
        />  
      </div>  
      <div className="form-group">  
        <label htmlFor="lastName">Last Name&nbsp;</label>  
        <input  
          type="text"  
          className="form-control"  
          id="lastName"  
          name="lastName"  
          value={lastName}  
          onChange={this.handleInputChange}  
          required  
        />  
      </div>  
    </form>  
  </div>  
)
```

[illegible]

```
);  
}  
}  
export default CustomerRegistration;  

---

import logo from './logo.svg';  
import './App.css';  
import CustomerRegistration from './CustomerRegistration';  
function App() {  
  return (  
    <div className="App">  
      <CustomerRegistration />  
    </div>  
  );  
}  
export default App;
```

OUTPUT

Customer Registration

First Name
Last Name
Email
Password
